

ELBRO Voltsensor

The useful, robust voltage and grounding tester with LED

The closer you move the voltage tester towards a voltage source, the clearer the signalling becomes via the louder warning tone, increasing vibration and brightness of the LED. You can also use it to locate lines for live cables in masonry.

The advantages:

- The closer to the voltage source, the stronger the signal
- Tester with function check
- No direct contact with live conductors
- Displays AC voltage at sockets, switches, panels, fuse boxes, cables, etc.
- Find cable breaks
- Phase tester 12V to 1000V AC
- Check fuses
- Check the grounding of electrical devices with metal housings
- Find lines in masonry

Technical specifications:

Signal	optical, acoustic, vibration
Measuring range	12 - 1000V AC
Power supply	2 x 1.5V Micro AAA , LR03
Overvoltage category	Cat IV 1000V
Protection rating	IP65
Integrated LED torch	yes
Weight with battery	95 g
Weight without battery	55 g

Included:

- 1 x instruction manual
- 2 x batteries
